- 3. Increased demand by stakeholders, including financial institutions, investors, and regulators, for clarity related to valuation process and the management of valuation risk.*
- 4. Additional demands on valuation professionals to address new types of assets or liabilities and to expand the application of valuations into areas such as environmental, social and governance (ESG).*
- 5. Integration of the proposed new financial instruments content.*

The Board reviewed the draft consultation questions for the Tangible Assets chapters.

Valuation of assets in a listed v unlisted environment

The Chair advised that the BVB and TAB had met in person and discussed this topic in Sydney.

The Chair further advised that he was currently finalising a paper outlining the house view on this issue and would share this with the TAB in advance of the next TAB conference call.

The Chair also advised that this issue had caused some brand damage to valuers due to the perceived difference in valuation between the NAV and market capitalisation for the same assets. Many journalists have seen this as evidence of inconsistent valuations and written article on this issue.

The Chair further added that in his opinion probably none of these valuations were incorrect but that it was more of an awareness issue in relation to perception of risk and the solution probably lay in education through the publication of a perspectives paper.

The Chair advised that in advance of any IVSC round table or the publication of any potential perspective paper on this issue the TAB would need to discuss this issue with the other asset boards and the SRB and should carry out the following steps: -

- Identify the difference between NAV and market capitalisation.]
- Explain why the difference is apparent.
- Identify solutions.

TAB discussed this issue further and noted that it was an issue for many firms. The Board was not asked to make any decisions.

Next steps

The Chair is to share the working paper outlining the house view on this issue in advance of the next TAB conference call.

Governance

The Chair advised the TAB on basis governance matters. The Chair further advised that any paper shared with the Board were confidential and should not be shared beyond the TAB unless requested. The Board was not asked to make any decisions.
